

Get with the times. Get DIGITAL.™

DD-HD-60 (60W - 300 Pixels Per Driver) SPECIFICATION

The DD-HD-60 is a unique and powerful DMX Pixel Driving Tool. Loaded with powerful macro Pixel patterns, controlled by 20 channels of DMX to create an **Instant Lightshow**.

In 'Full Mode' the DIGITAL Driver will control the pixels in two's, three's, four's or groups of five sharing the RGB clusters over 450 DMX Channels. The additional channels can be used to access the **built-in macro patterns** including **sound-to-light**.

Options of 3 Pin or 5 Pin DMX XLR is available, with the addition of either IEC Mains Input or Powercon.
