DD-SD-30 (30W - 150 Pixels Per Driver)

SPECIFICATION

The DD-SD-30 is a unique and powerful DMX Pixel Driving Tool. Loaded with powerful macro Pixel patterns, controlled by 20 channels of DMX to create an **Instant Lightshow**.

In 'Full Mode' the Driver will control the pixels in 1, 2, 3, 4, 5 or 6 RGB clusters over the DMX Channels. The additional channels can be used to access the **built-in macro patterns** including **sound-to-light**.

Options of 3 Pin or 5 Pin DMX XLR is available, with the addition of either IEC Mains Input or Powercon.
